Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 18-26, and 35-60 are drawn to a method and system of assembling an optical module comprising the steps of measuring an outgoing angle of light, classified in class 356, subclass 139.04.
 - II. Claims 10-17 and 27-34 drawn to a method and system for assembling an optical module comprising the steps of detecting a FFP of a light output from at least one optical component configured to receive a light emitted from a light-emitting element, classified in class 356, subclass 3.02.
 - III. Claims 61-74, drawn to a computer program product, classified in class 717, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility from Group II such as in Group I the method and system assembles an optical module comprising the steps of measuring an outgoing angle of light emitted from a light-emitting element and orienting the light-emitting element based on the outgoing angle, and in Group II the method and system assembles an optical module comprising the steps of detecting a FFP of light output from at least one optical component configured to receive a light emitted from a light-emitting element. See MPEP § 806.05(d).

3. Inventions of Group I and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a method and system of assembling an optical module and a computer program product.

4. Inventions of Group II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a method and system of assembling an optical module and a computer program product.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *Allyson Sanders* whose telephone number is (703) 305-5779. The examiner can normally be reached between the hours of 7:30AM to 4:00PM Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee, can be reached on (703) 305-3503. The fax phone number for this Group is (703) 308-7722, (703) 308-7724, or (703) 308-7382.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [allyson.sanders@uspto.gov].

All Internet e-mail communications will be made of record in the application file.

PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
